

For persons in outdoor areas

MPT turnstiles are the ideal solution for controlling access outdoors when many people are to enter or leave an area in a short time. MPT turnstiles can be precisely adapted to your intended purpose thanks to the drive variants offered: the electric motor-driven MPT 132 turnstile is set in motion by means of an energy-efficient, maintenance-free MHTM™ drive unit – the first choice for representative security for outdoor areas and company grounds. The MPT 33 has an electromechanical interlock unit and the rotary movement is generated by users themselves – a popular variant at leisure parks and stadiums. Both drive versions can be controlled

by means of all conventional access control systems and can be operated in both throughflow directions as an option. The purely mechanical MPT 30 turnstile only lets visitors pass in one direction and is thus particularly suitable for unmonitored exits at swimming pools and sports facilities. MPT turnstiles can also be individually adapted to your requirements in other ways: with a variety of material options, interlock variants, additional attachments and expansions for bicycles, wheelchairs and the transport of material.

For individual persons

MPT turnstiles are the ideal solution when it is necessary to secure outdoor areas with high rates of pedestrian traffic. Numerous options are available for access control.

Innovative drive technology

The MHTM™ drive unit (optional) is maintenance-free, energy-efficient, and has an exceptional soft-start action.

Maximum safety

Low impact forces and sensitive contact detection offer optimum protection for users.

Easy access to components

All the components necessary for operation are accommodated in the main beams, considerably simplifying assembly, commissioning and maintenance.

MPT

Turnstile

- > Reliable securing of outdoor areas and company grounds with high rates of pedestrian traffic
- > Mechanical, electromechanical or motorized designs available
- > Sensitive impact detection for maximum safety
- > Numerous options, e.g. expansion for wheelchair access
- > Designed for 10 million opening and closing actions

Access to Progress

Magnetic stands for pioneering products – in every way. Our access control systems for vehicles or pedestrians clear the way for thousands of people every day – at car parks, toll gates, stations, airports and in buildings. Our technology is also pioneering, however: with innovative drives, intelligent control systems and well thought-out details it provides maximum safety and longevity. Are you also on the path to Magnetic?
